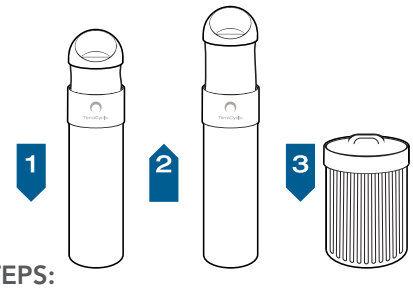
Long-life Cylinders

Each Terracyclic™ sanitary disposal unit consists of a long-life wall mounted cylindrical unit, which holds the replaceable lid and liner (cartridge).

Terracyclic's™ unique design and compact size guarantees cylinder life is extended. Once it is mounted on the wall, the slim line unit never needs to be handles again. This makes cubicle cleaning easier and is a discreet addition to any rest room.

The units are manufactured in white. Other finishes are available on request.



3-EASY-STEPS:

1. Insert a new cartridge into cylinder base
2. Remove the cartridge when full
3. Place the cartridge in any general rubbish receptacle

Free-standing

Our free-standing option offers a fast and simple installation solution.

Wall-mounted

Our wall-mounted option offers a space saving solution that looks great and easy to install.

Self-deodourising

Our self-deodorising and antibacterial disposal lid and inner cartridges make the system safe and customer friendly.

Minimal contact

Our minimal-contact system was designed to protect both customers and service providers.

Biodegradable plastics

Our Sanitary Waste Disposal Unnit uses biodegradable plastic additives with deodorising chemicals that are safe and friendly for the environment.

Disposable cartridges

Our unique disposable lid and inner cartridge system, makes for a safer, cleaner and faster change solution.
