envirobin

SUSTAINABLE | INNOVATIVE

Made from 100% Recyclable

Envirobins are tough and designed for reuse, but even good things come to an end. Conscious of the impact our products have on the Earth during every stage of their life, we've made your waste bin fully recyclable.

Strong & Durable

Just like carbon fibre, you wouldn't expect something so light and flexible to be so strong and durable, but thanks to the inherent properties that Polypropylene, the material Envirobins are made from, it is! Making it light and easy for cleaners to handle, yet tough enough to resist everyday impacts, water or chemicals.

Reinforced Handles

With all of our designs we consider form, function and sustainability. So to ensure maximum functionality for you, our 60L bins feature a purpose built reinforced handle to allow for a strong grip when shifting, lifting or manoeuvring your waste bins over the course of their lifetime.

ALL-RECYCLABLES

- Jars, Aluminum and steel cans
- Empty juice and milk cartons
- Empty glass bottles, plastic bottles and containers
- Disposable plastic containers
