ECO PAPER RANGE

With a mix of sugarcane pulp & mixed wood you don't have to sacrifice on quality when going green! Enviroplus Eco Paper are a forest friendly paper range that are perfect for any facility looking to reduce their carbon footprint without sacrificing on high quality paper products!

Our Eco range is a revolutionary paper made from part sugarcane, namely recycled sugar cane bagasse, an agricultural crop by-product and is an eco-friendlier option for the environment. Bagasse is the fibrous residue left over after the sugarcane has been crushed and the sugar extracted. The bagasse is pulped and ECF bleached, and then the bagasse fibres are woven to create our paper. The supply is renewable and the manufacturing produces less waste and carbon emissions, leaving you with paper that's cost effective and forest friendly.

- 100257 - Enviroplus Eco Paper - 2 PLY 400 SHEETS
- 100261 - Enviroplus Eco Paper - SLIMLINE I/L TOWEL (CTN 4000)
- 100259 - Enviroplus Eco Paper - 2 PLY 300 JUMBO (CTN 8)
